Global Link Translations provides interpreting and translation services to state agencies, hospitals, attorneys and corporations. Our seasoned interpreters and certified translators are proficient in all major languages. Our translators are experts in a variety of fields, including medical, legal, pharmaceutical, finance, and technology. We translate to and from all languages. Our translators and interpreters are chosen not only for their linguistic skills but also for their technical expertise.

On-Site Interpreting

Global Link provides experienced on-site language interpreters for Hospitals, Attorneys, Schools, State Agencies, Case Management Companies, Corporations/ Businesses, and Human Service Agencies.

Global Document Translation

Clearly identifying the target audience is the first and most important step in developing an effective translation. This decision involves determining the literacy level, the cultural concepts, and the regional language variations that are to be incorporated into the translation. The goals of translation include assuring reliability, completeness, accuracy, and cultural appropriateness. The procedure commonly involves two translators; one to perform the initial translation, and a second, independent translator to review and edit the translation.
